#### **Admissions Policy**

The Graduate School of Human and Socio-Environmental Studies' Doctoral Course aims to educate university faculty, researchers, and highly skilled professionals who are able to shine in multidisciplinary human and socio-environmental research.

The division thus seeks students who not only have high-level specialized skills in their traditional academic fields but also the determination to, based on these skills, engage in innovative research from a more general, integrated perspective. At the Division of Human and Socio-Environmental Studies, education and research is focused on diverse spheres covering cultural environments, social environments, and humans themselves. Therefore, students studying here are expected to, above all, have an open attitude towards others, an open mind respectful of other cultures, an active interest in other cultures, a flexible mindset regarding unknown phenomena, and a strong orientation toward logical thinking.
